

## IFRS 16 Leases

A more transparent balance sheet

13 January 2016

kpmg.com/ifrs

## More transparent lease accounting

"IFRS 16 will bring most leases on-balance sheet from 2019. All companies that lease assets for use in their business will see an increase in reported assets and liabilities.

This will affect a wide variety of sectors, from airlines that lease aircraft to retailers that lease stores. The larger the lease portfolio, the greater the impact on key reporting metrics."

Kimber Bascom, KPMG's global IFRS leasing standards leader

#### What's the issue?

Currently analysts adjust financial statements for off-balance sheet leases

Under IFRS 16, companies will bring these leases on balance sheet, using a common methodology

# Major impacts for lessees

#### Lessees face major changes

#### All major leases on balance sheet

#### **Balance sheet**

#### **Asset**

= 'Right-of-use' of underlying asset

#### Liability

= Obligation to make lease payments

#### P&L

#### Lease expense

**Depreciation** 

- + Interest
- = Front-loaded total lease expense

## Impact on balance sheet

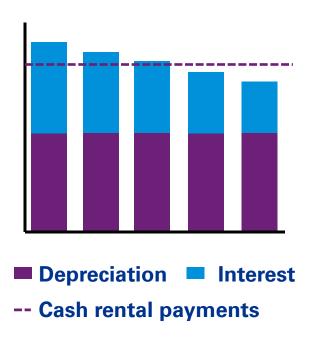

Companies with operating leases will appear to be more asset-rich, but also more heavily indebted

## Impact on profit/loss

Total lease expense will be front-loaded even when cash rentals are constant

## Impact on financial ratios

**Profit/loss** 

**Balance sheet** 

**Ratios** 

**EBITDA** 

**Total assets** 

**Gearing** 

**EPS** (in early years)

**Net assets** 

Interest cover

**Asset turnover** 

KPMG

# New definition, new accounting

#### Lease definition

The new on/off-balance sheet test for lessees – a key judgement area

Lease classification test

**New standard** 

**Old standard** 

ON

Lease

Finance lease

**OFF** 

**Service** 

**Operating lease** 

#### Lease definition - Control

The new definition increases focus on who controls the asset and may change which contracts are leases

## Lease definition - Exemptions

Two major optional exemptions make the standard easier to apply

Short term leases

≤ 12 months

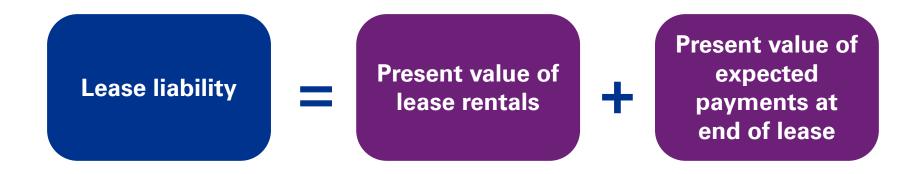

Leases of low value items

≤ USD 5,000 for example

## Measuring the lease liability

## Variable lease payments

Which variable lease payments are included in the lease liability?

Payments based on an index or rate

Payments based on turnover or usage

#### Lessor accounting

Lessor accounting remains similar to current practice...

but lacks consistency with new lessee accounting model

Lease classification test

Finance leases and operating leases

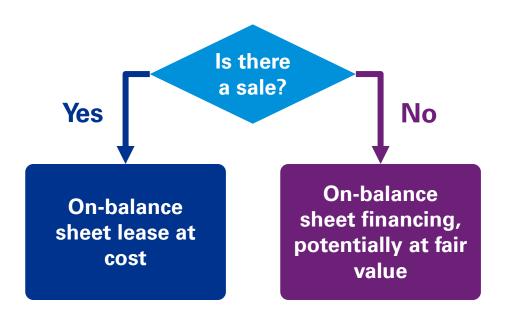

Consistent accounting model for lessors and lessees

#### Sale-and-leaseback

IFRS 16 essentially kills sale-and-leaseback as an off-balance sheet financing structure

KPMG

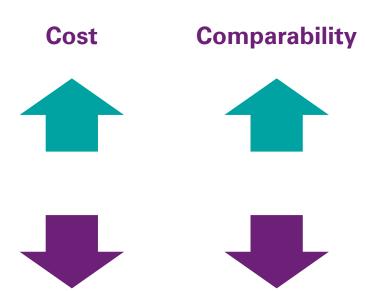

# Multiple transition options

## Applying the new lease definition

Apply the new definition to all contracts

OR

Grandfather existing contracts and apply the new definition only to new contracts

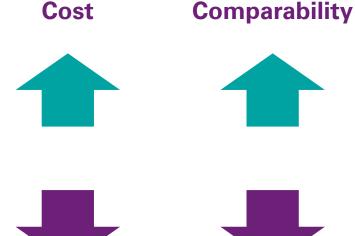

## Applying the new standard

A lessee can choose to apply the standard...

Retrospectively to all accounting periods

OR

As a 'big bang' at the date of initial application

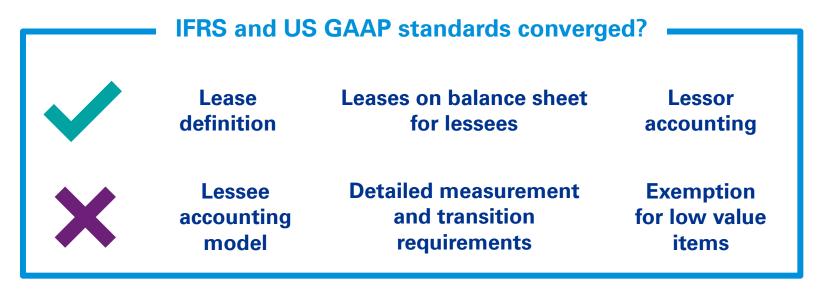

KPMG

## IFRS ≠ US GAAP

#### IFRS vs US GAAP

#### We expect the FASB to publish its new standard soon

# Next steps

## Things to think about now

Some questions to assess the impact on your company's financial statements

Which contracts are leases?

Which transition options to choose?

**Database of all leases?** 

Systems and processes in place?

What about ratios and covenants?

#### Next steps

Read the new standard

Think about your implementation plan
