KPMG Innovation Challenge Registration Form (cont.)

Please select (v) the challenge of your choice – Students can pick one of the challenges below, or combine solutions across multiple challenges. Solutions can be a concept paper or a proof of concept (e.g. tools, technology) that addresses the challenge.

No	Topic	Challenge Description	Please tick
1	Artificial intelligence	Chatbots are convenient and smart, but what if they compromised and used for malicious purposes? How do you detect if the chatbots are genuine and not infiltrated by attackers?	
2	Industrial Internet of Things	Imagine a smart city where things are interconnected – parking meters, bike rentals, traffic lights, CCTVs, etc. How do you secure data collected by things in this smart city from attackers?	
3		LoRaWAN provides communications for things in a smart city. LoRaWAN gateway is a transparent bridge between things and central server. How do you detect a rogue LoRaWAN gateway in a smart city?	
4	Blockchain	Cyber criminals have been using blockchain technology to hide their tracks. For example, the WannaCry ransom payments were made using Bitcoin. How do you track Bitcoin transactions (e.g. exchanging Bitcoin with paper currency) of the cyber criminals?	

Participation in the KPMG Cyber Security Challenge constitutes you and your team members' full and unconditional agreement to and acceptance of the Terms and Conditions. For full terms and conditions, please visit www.kpmg.com.my/cybersecuritychallenge
